

Step 4

# Crafting your story

## Directions

Alright, Shakespeare, let's try it.

**1** Draft your story, with the components in the order and narrative arc you've selected, in words. ***Just take a stab at it—put a pen to the paper provided here.***

**2** Don't forget: Add lots of details! ***What did it look and feel like when these things happened?*** Often times, the details are the easiest entry way to start writing.

**3** Once you've written it out, get creative about how else this story could be expressed. ***Should it include imagery? Should it be a presentation of slides? Should it be a video with voiceover?*** Imagine away!
